## ILLINOIS 1962 MINERAL PRODUCTION BY COUNTIES

W. L. Busch

What was the total value of all minerals produced in Illinois in 1962? How many dollars worth of minerals was produced by each of the 102 counties in the state? Where in Illinois were the various minerals produced?

Illinois mines, pits, quarries, and wells in 1962 yielded minerals worth \$631,000,000, the highest annual value ever attained by the state. Included in the total are coal, oil, stone, clay products, sand, gravel, fluorspar, zinc, lead, and other mineral products. Some of the minerals are produced in many Illinois counties, others are available in only one or two counties.

The tables of this brief report break down the 1962 value and production figures to show how much each county contributed to the state's total. The counties are arranged by regions to indicate the pattern of mineral production in various parts of the state.

A summary of Illinois county mineral production in 1962 shows that 35 counties produced coal, and 40 produced oil. Crushed and broken stone was produced in 61 counties, while 61 counties produced common sand and 59 counties produced common gravel. Clay products plants reported production in 30 counties throughout Illinois. Only one county produced tripoli, and two produced fluorspar in the extreme southern part of the state. In the northern portion of Illinois two counties produced cement and two produced all the state's silica sand.

The Illinois county outline map on the last page of this report shows the nine regions into which the counties of the state have been divided so that regional production values can be tabulated. Where it is necessary to conceal confidential individual production information, counties of a given geographical area are combined so that the mineral identification of that region might be preserved.

SUMMARY OF ILLINOIS MINERAL PRODUCTION, 1962

Material	Quantity	Value at plants
Coal-bituminous	48,353,913 tons	\$186,646,104
Crude oil	78,800,000 bbls	236,400,000
Crushed stone	38,528,222 tons	52,313,576
Cement	9,585,862 bbls	31,525,449
Clay products	—	56,495,460
Common sand	13,880,962 tons	11,943,268
Common gravel	16,123,325 tons	15,040,907
Special sands	—	12,026,071
Fluorspar	132,830 tons	6,391,673
Zinc	27,413 tons	6,304,990
Lead	3,610 tons	664,240
Other materials	—	15,248,262
TOTAL		<u>\$631,000,000</u>
